

[REDACTED] STIPPLED NOFORN

P: 90102-1
V: 049
D: 900906
T: 1220-1315
S: 01

Summary of Information

EET (a). The event involves two vessels: a 50'-60' two masted sailing boat and a large freighter. The sail boat is beige or white with a bright blue strip running completely around it just below deck line. It has two main masts and a third boom-like object projecting off of the stern. This sail boat has a peculiar aspect about it...maybe it is the main mast, which appears to come out of the middle of the cabin. There are bright colors of red and yellow somewhere on the boat. Everything on the sail boat either looks new or is new. It is meticulously maintained. Names associated with this sail boat are "MANIP____", "OSCEOLA", "GRAMITS" and Costa Rica. The second vessel is older and constructed of metal. It has the appearance of a large coastal freighter/small ocean freighter. It has a light green or beige hull with a white and red super structure. It also has red objects attached to the outside. There are colors of grey, green, blue and brown visible of deck. There are numerous large reddish spots reminiscent of rust. It has one mast forward and squarish objects sitting on deck midship. The names associated with this vessel are "CHARQUEZ" or "GARQUEZ", "GARCIA", "RAMONA" and Venezuela. Names associated with the cargo of the freighter

[REDACTED] STD NOFORN

██████████ STD NOFORN

are "JACQUWAY or JACQUWHA", "OSCAR" and "PLIPO". There is a flag associated with the freighter. Its appearance is one of two following depictions: 1) the top half is black, the bottom half is yellow and there is a green-colored emblem centered on the flag, or 2) the flag is divided diagonally lower left to upper right; the upper left is a checkerboard of black and yellow squares and the lower right is solid white or light orange; again, there is a greenish emblem centered on the flag.

EEI (b): Locations: Vessel #1 (Sail boat): 1610 N 108 W
Vessel #2 (Freighter): 1045 N 11240 W

EEI (c): The type of contraband involved with this event appears to be marijuana. It is stored in large dark shiny bags on board the freighter. The stuff will be dropped from the freighter's port side into the ocean. The bags of stuff are very inflated and there will be some sort of marker or signaling device attached to the bags to facilitate their being found/located by the sail boat.
